

Connected cluster means (systematic): bubble = MOTILITY_INDEX

Systematic encoding: bubble = MOTILITY_INDEX; ternary axes = OXYGEN_INDEX, STAIN_INDEX, SPORULATION_INDEX
Between-cluster variance (% of total across four GOLD indices): OXYGEN_INDEX 35.7%; STAIN_INDEX 20.3%; MOTILITY_INDEX 43.1%; SPORULATION_INDEX 0.9%

MOTILITY_INDEX (43.1% of total between-cluster variance) • 0.00 ● 0.25 ● 0.50 ● 1.00

Cluster means of GOLD indices; simplex axes; path connects a, i, e. Grid: constant-share lines (10% minor / 20% major) in the simplex.
